

SalesTeam

Your AI sales team, right inside LinkedIn.

Backed by a growing team of AI agents — a Sales Assistant, a Sales Mentor, and a Customer Voice

WHO IT'S FOR

Meet Elena, B2B Software & Services Sales Manager

Sells enterprise software & AI-driven services in a competitive B2B market. Hits quota by finding companies actively signaling a need — not by cold-calling blind.

SAYS

- “I know the leads are out there somewhere on LinkedIn.”
- “I don't have hours to scroll every morning.”

THINKS

- “Did I miss the perfect post because I searched the wrong week?”
- “Sales Navigator finds people — not the moment they're ready to buy.”

DOES

- Runs the same 5 keyword searches by hand, morning after morning.
- Skims hundreds of results by eye, one tab at a time.

FEELS

- Behind, every day it isn't done.
- Relieved on the rare day she finds a great lead early.

Lead generation eats the day — and the gap is widening

THE PROBLEM

- **Repetitive manual work.** Finding buying-intent signals means running the same keyword searches by hand, across Posts and Jobs, every day.
- **Wrong tool, wrong job.** Sales Navigator and enrichment tools find contact info for a name you already have — not who's signaling a need right now.
- **The cost.** Hours lost weekly to manual searching — or leads simply missed.

WHY NOW

- **More noise.** LinkedIn is bigger and busier than ever — more signal buried under more scroll.
- **Riskier shortcuts.** Automation tools like Waalaxy, Expandi and Dripify saw a wave of account restrictions in Jan–Mar 2026.
- **The platform caught up.** Manifest V3, Chrome's side panel, and Claude's tool-use API make a careful, reasoning-backed assistant possible now.

“Generate sales leads on LinkedIn without spending hours on repetitive manual searches — and without investing in big, complicated sales tools.”

Not just a leads generator — an AI sales team in your browser

An easy-to-use browser-embedded tool that performs smart, automated searches with custom targeting via keywords and filters.

- **Topics.** Define reusable keyword groups, with an optional second “AND with” condition.
- **One click.** “Scan All Topics” searches every Topic across both LinkedIn Posts and Jobs.
- **One ranked list.** Results are merged, deduplicated and ranked — tagged with matched keywords, hiring/freelance signals, and job-ad detection.
- **Safe by design.** 100% manual-trigger. Nothing runs unattended, so it stays on the safe side of LinkedIn's policies.
- **An AI sales team on top.** Specialist agents that prioritize leads, draft outreach, and pressure-test your message — detailed next.

A growing team of specialist agents, on call 24/7

SALES ASSISTANT

Agent-in-progress · lead operations.

- Today: scans Posts + Jobs, builds one ranked lead list.
- Next: tracks every lead's status and flags who needs a follow-up, so nothing falls through the cracks.

SALES MENTOR

AI Agent · 25 years of experience.

- Ask which leads to prioritize, how to approach one — or a general strategy question.
- Decides for itself when it needs to check real lead data before answering.

CUSTOMER VOICE

AI Agent · realistic buyer persona.

- Bounce a sales pitch or message off it before it ever reaches a real lead.
- Ask it about needs, pains, or how it prefers to be approached — an open-ended interview, not a fixed script.

One shared tool-use engine powers every agent on the team — each just gets a different persona and a different set of tools it can call on its own. That's genuine agentic AI: the model decides what it needs to look up, not a scripted chatbot. More specialist agents join the team as new needs surface.

See it live →

1

Define a Topic

e.g. “AI Transformation”:
AI, Machine Learning,
LLM...

2

Click “Scan All Topics”

Runs every enabled Topic
across Posts and Jobs, one
after another.

3

Review the ranked leads

One merged,
deduplicated list — most
relevant first.

4

Ask Sales Mentor for advice

“Which lead should I
approach first?” —
grounded in your real
results.

5

Ask Sales Mentor to draft it

Turns its own
recommendation into a
ready-to-send opening
line.

(Switch to the extension's side panel now for the live walkthrough.)

HOW IT WORKS

Runs inside your own LinkedIn session — architecture underneath

- **Native browser extension.** Chrome/Edge, Manifest V3, in the side panel next to LinkedIn.
- **Adaptive query-chunking.** Works around LinkedIn's undocumented search-complexity limits automatically.
- **Agents call tools, not scripts.** Claude decides, mid-conversation, when to fetch real lead data.
- **Your data stays yours.** Only the AI features send lead text to Anthropic, using your own key.

No server of our own — everything above runs on your device or a third-party API you already trust. Roadmap: a Leads Dashboard next, using this same local data (see the final slide).

Grounded in real market data, not invented numbers

TAM — \$4.85B

~8M B2B sellers worldwide

Global sales intelligence software market, 2025 · Sourced ↓

SAM — ~\$730M

~1.2M individual / SMB sellers

Our estimate: ~15% of TAM — the slice without a full enterprise sales-intelligence budget · Our estimate

SOM — ~\$36.5M

~60K potential buyers

Our estimate: ~5% of SAM — realistically reachable over several years, not a year-1 target · Our estimate

TAM growth, 2025–2030

11.10% CAGR · Fortune Business Insights

Sources: TAM and 5-year projection (11.10% CAGR) from Fortune Business Insights' Sales Intelligence Market report. Buyer counts extrapolated from U.S. Bureau/industry data (~2.5–3M B2B sellers in the U.S.) scaled to a global estimate — not an independently sourced global figure. SAM and SOM buyer counts and market size are our own estimates.

THE LANDSCAPE

Everyone solves a slice. We watch the signal — and coach the play.

	Runs in your session	Finds intent signals	No outreach-automation risk	AI sales team for support	Price
Sales Navigator	✓	✗	✓	✗	\$99.99/mo/seat
Contact enrichment (Apollo, Lusha, Kaspr, ZoomInfo)	✗	✗	✓	✗	\$39–166/mo
Outreach automation (Waalaxy, PhantomBuster, Dux-Soup...)	●	●	✗	✗	\$30–120/mo
Manual browsing	✓	●	✓	✗	Free
SalesTeam	✓	✓	✓	✓	Low-cost

● = partial ✗ = no. ~40% of accounts on flagged automation tools were restricted in a single quarter (Jan–Mar 2026). No competitor offers an AI sales team backing up the seller.

A working alpha, not a mockup

- **Shipped.** v0.6 built and running today — Posts + Jobs scanning (English & German), AI-drafted outreach, and working AI agents: Sales Mentor and Customer Voice, with the Sales Assistant's own agent capabilities next.
- **Proven at scale, live.** After a real optimization pass, one batch scan surfaced 75 ranked leads across Posts and Jobs — up from 12 in the first run — with zero manual searching.
- **Real agent conversations, not mockups.** Sales Mentor and Customer Voice already hold real tool-calling conversations grounded in scraped lead data.
- **A second real user, real feedback.** In active use by a second B2B salesperson — a real sales team lead — whose real usage has already surfaced and fixed genuine reliability bugs.

This isn't a concept slide — it's a product (and an AI sales team) that ran on the real LinkedIn this week.

Freemium pricing, illustrative unit economics

FREE

\$0

- 1 active Topic
- Posts search only
- Manual export

PRO

\$12/mo

- Unlimited Topics + Job Search
- AI drafting, Sales Mentor & Customer Voice
- CSV export + settings sync

North star metric: Weekly Active Scanners. Pricing and economics above are illustrative placeholders for a course exercise — not based on real pricing tests, real conversion data, or market research, and should not be read as a forecast.

Roadmap and what we need next

NOW · v0.6

- Posts + Jobs scanning, English & German
- AI-drafted outreach (reviewed, never auto-sent)
- Sales Mentor & Customer Voice agents

NEXT

- Sales Assistant becomes a full agent: tracks every lead's status (New, Contacted, Responded, Needs Follow-up, Success)
- A leads dashboard that flags who needs attention

LATER

- Push validated, successful leads straight into Salesforce or another CRM
- Integrating with Sales Navigator to enhance search and filtering capabilities
- Chrome Web Store distribution
- Team workspaces

THE ASK

Feedback on this direction, and introductions to 3–5 pilot sales teams willing to alpha-test the full AI sales team — scanning, drafting, and advisors — against their real pipelines.

Every LinkedIn seller deserves an AI sales team behind them — not a blank search bar.

Thank you.

APPENDIX

Backup material — shown only if it comes up in Q&A.

Works with or without Sales Navigator

WITHOUT Sales Navigator

- The core use case — works on any LinkedIn account, free or paid.
- Topics become the only way to systematically surface buying-intent signals.
- No added subscription cost on top of what the seller already pays (if anything).

WITH Sales Navigator

- The same Topics engine layers on top of Sales Navigator's richer people/company filters.
- Sharpens targeting instead of replacing the subscription — makes an existing spend work harder.
- Roadmap: direct integration with Sales Navigator's saved searches.
